# Table des matières

- Administration
  - Organisation du projet
  - Gestion des utilisateurs
    - Enregistrement des participants
  - Gestion des aires à surveiller
- L'observation par satellites
  - Plateformes, orbites et instruments
  - Sentinel-2 – Optique HR
  - Sentinel-1 – Radar HR
- Photo-interprétation
  - Examiner les évènements d'une Aire à surveiller
  - Vérifier un événement avec:
    - les cartes de base
    - des images optiques
    - les précipitations l'ayant précédé
- Mission de terrain
  - Préparer la mission
  - Exécuter la mission
  - Retourner de mission, partager les ressources

VT-P281-TRN-004-F-01-00 - Agenda de la formation  
- page 1 -

## Formation « FLEGT Watch »

Présentation du projet et des données satellitaires,  
photo-interprétation,  
mission de terrain

### Lundi 29 juillet 2019 - Introduction

#### Après-midi

- Présentation des participants
- Objectifs et organisation du projet « FLEGT Watch »
- Création des comptes utilisateurs : « Observateurs indépendants »
- Présentation des « Aires surveillées » (concessions forestières) actuellement actives
- Création éventuelle de nouvelles « Aires surveillées » - présentation du SIG d'appui

### Mardi 30 juillet 2019 -Présentation des images Sentinel-2 et Sentinel-1

#### Matin

- Présentation des données optiques Sentinel-2
- Traitement, photo-interprétation et partage
- Photo de famille

#### Après-midi

- Présentation des données radar Sentinel-1
- Traitement, photo-interprétation et partage

### Mercredi 31 juillet 2019 -Présentation de « FLEGT Watch »

#### Matin

- Présentation du portail (composante Web) de « FLEGT Watch »
- Découvrir et analyser les événements sur les aires à surveiller
- Choisir la cible de la mission de terrain

#### Après-midi

- Téléchargement de l'application « FLEGT Watch App »
- Préparation de la mission
- Simulation d'observations dans cette mission

### Jeudi 1<sup>er</sup> août 2019 -Mission de terrain

### Vendredi 2 août 2019 -Exploitation des observations lors de la mission de terrain

#### Matin

- Visualisation / écoute des observations de terrain
- Edition du rapport de mission
- Evaluation de la formation et recommandations pour l'amélioration de « FLEGT Watch »
- Remise du certificat de formation

Matériel des participants : PC et/ou smartphone avec navigateur Web et gestionnaire d'e-mails.

Contact FLEGT Watch : [flegtwatch@visioterra.fr](mailto:flegtwatch@visioterra.fr)

# Organisation du projet

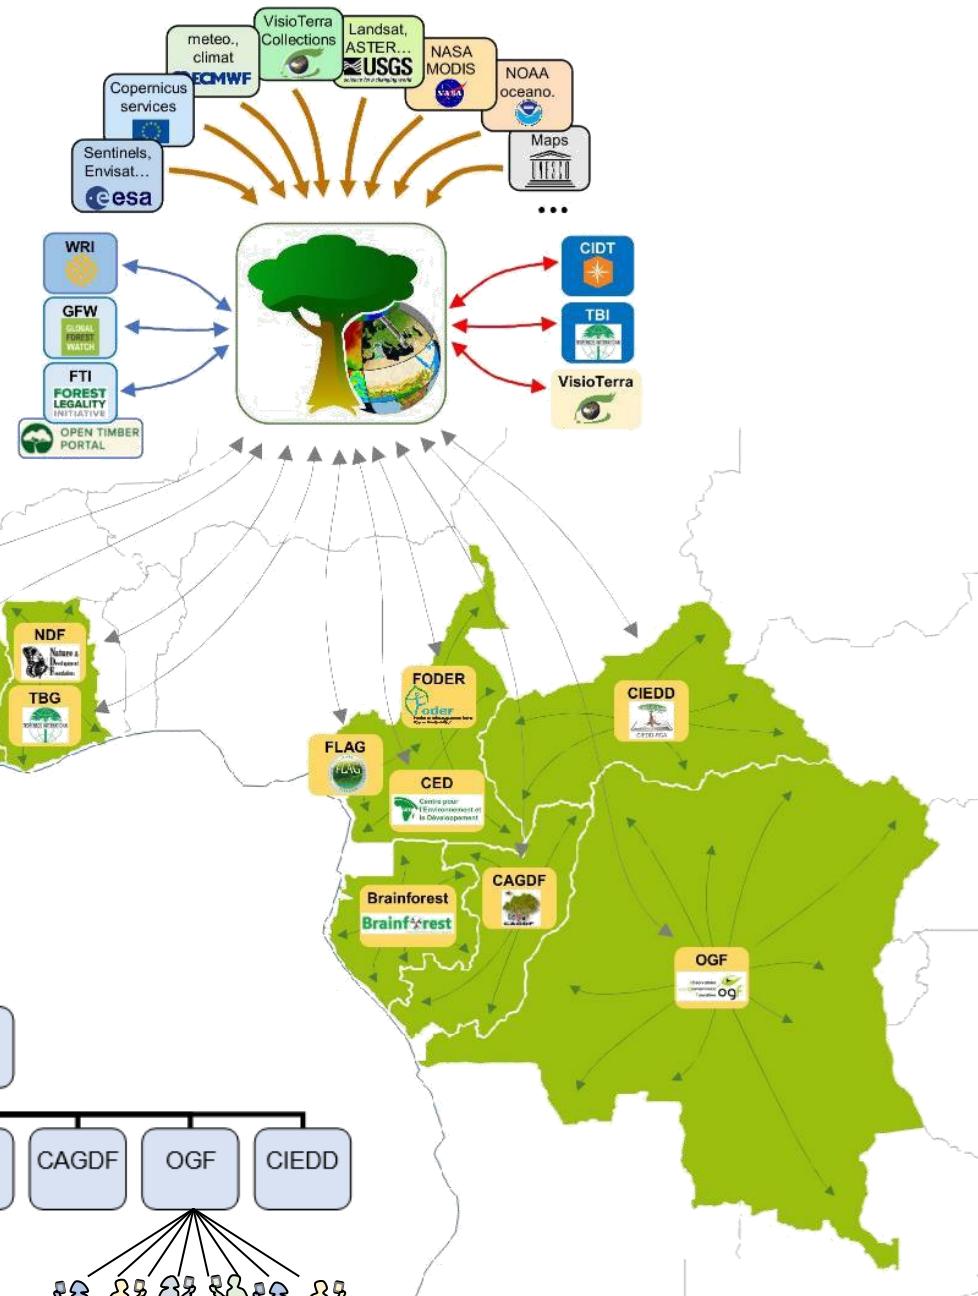

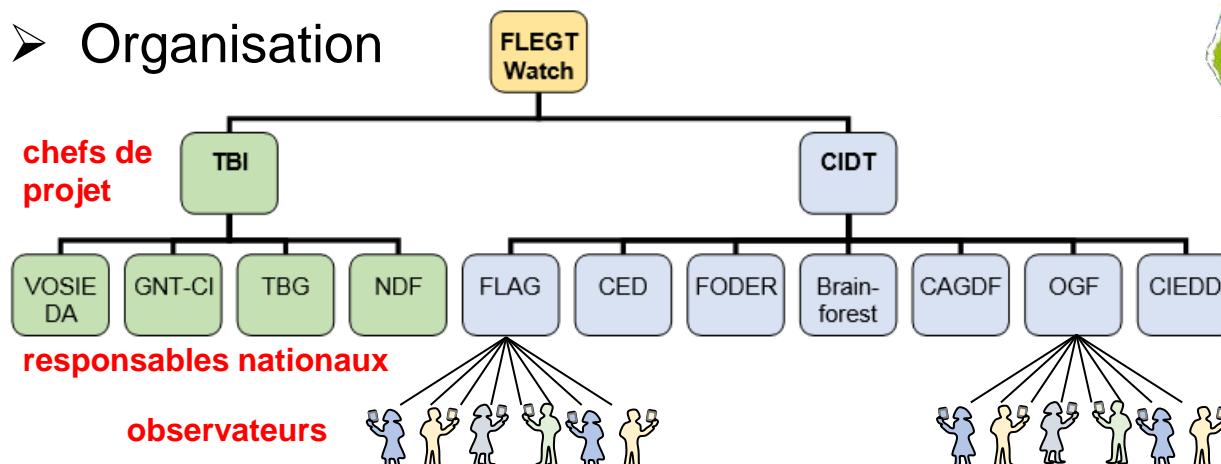

- “FLEGT Watch” offre les mêmes services aux deux sous-régions:

- Afrique de l'Ouest – Liberia, Côte d'Ivoire, Ghana
- Afrique Centrale – Cameroun, Gabon, République Centrafricaine, Congo, RDC

- Objectifs de “FLEGT Watch” :

- performances – en utilisant les toutes nouvelles technologies
- sécurité – en protégeant la communauté des observateurs
- tracabilité – en enregistrant les observations des satellites et de terrain

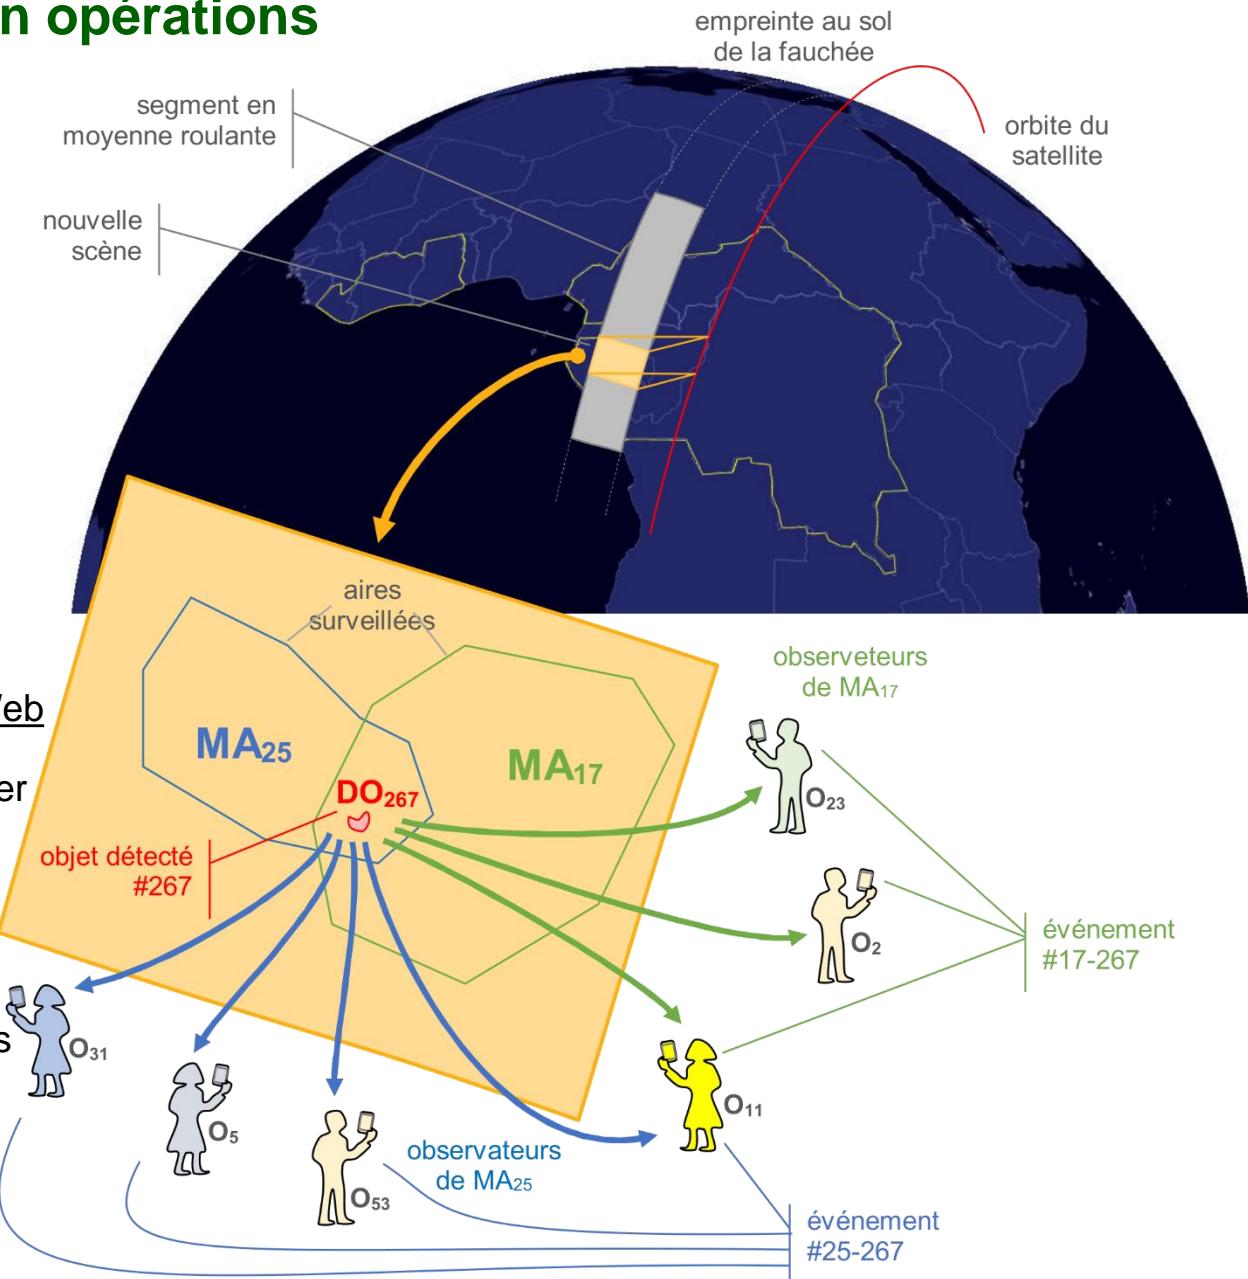

- Organisation

# FLEGT Watch en opérations

- Observations satellite tous les 6 jours en utilisant S1A et S1B
- Détection automatique avec des algorithmes toujours optimisés
- Les objets détectés ont un indice de confiance
- Distribuer les événements dans les aires à surveiller
- Les observateurs évaluent un événement sur FLEGT Watch Web
- Les observateurs peuvent évaluer l'événement sur le terrain
- Des observations de terrain peuvent être collectées
- Ces observations sont partagées à travers la communauté
- On peut produire un rapport de mission de terrain

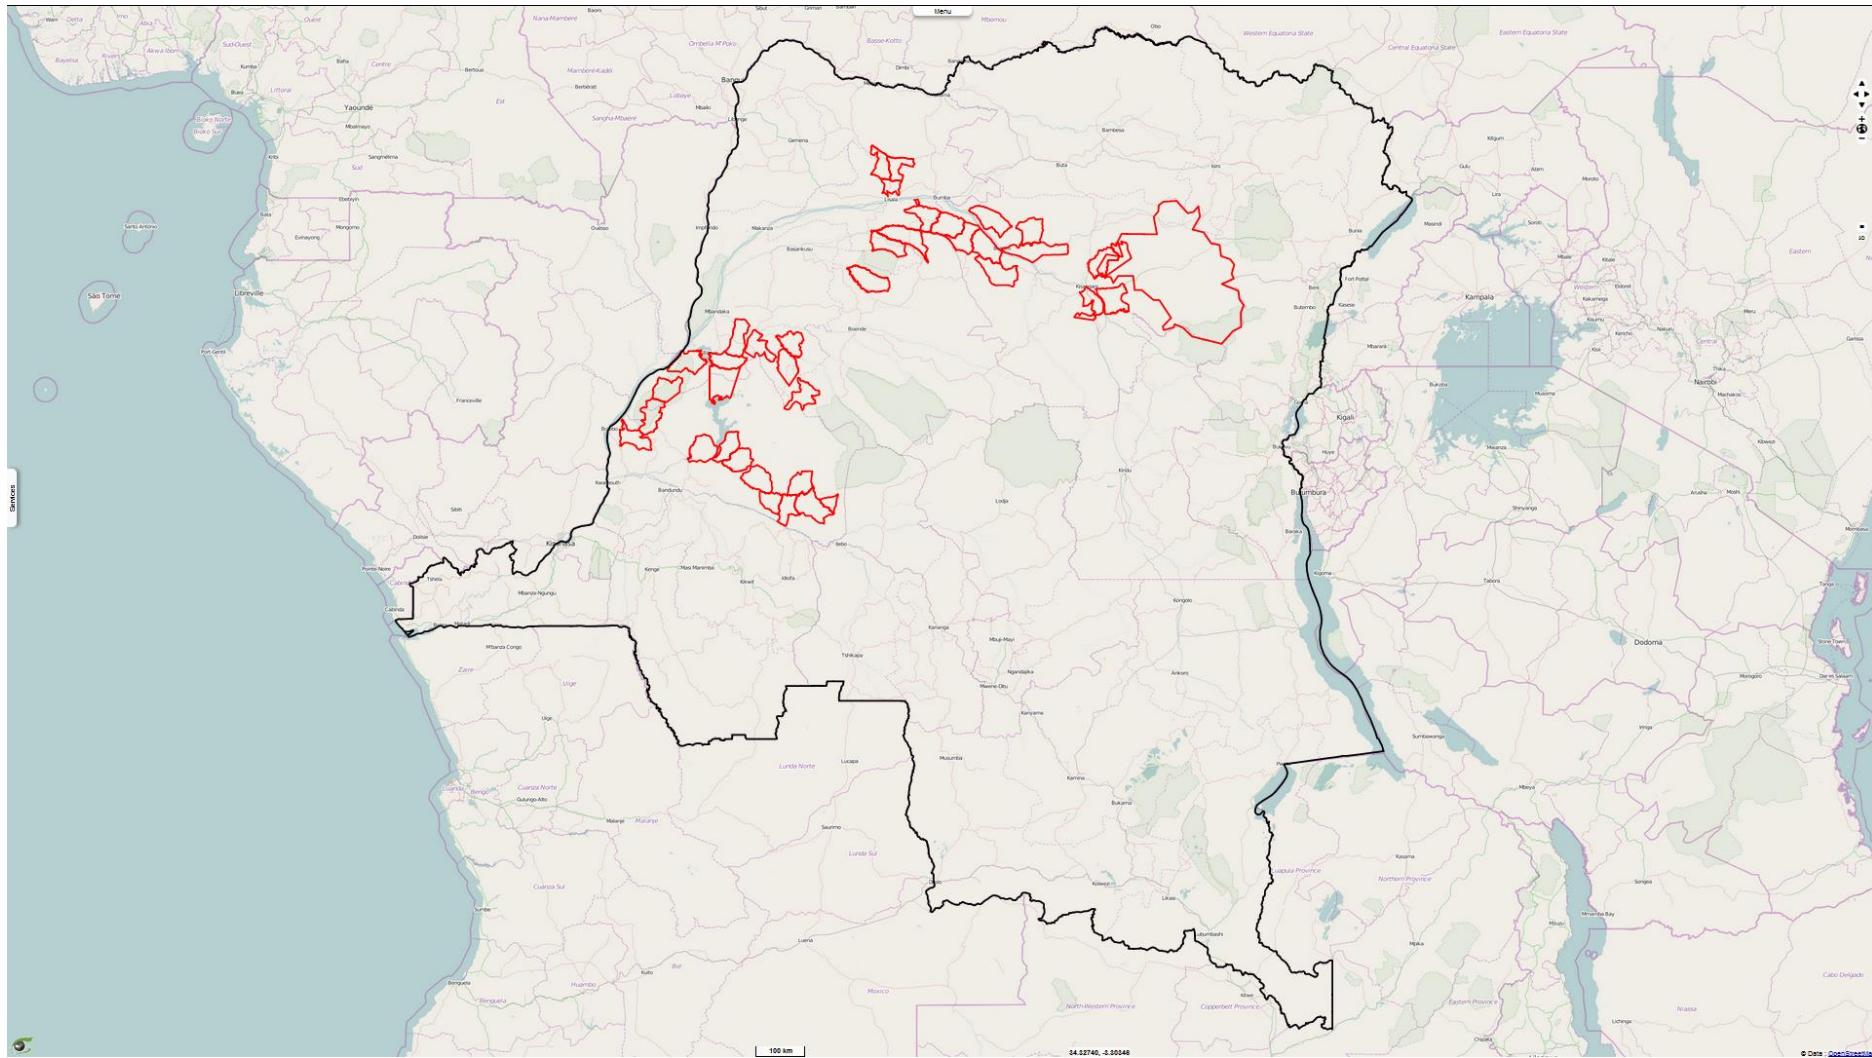

# Observateurs en RDC (liste collectée le 29 juillet 2019)

eoPortal Directory

OLCI bands function: <https://sentinel.esa.int/web/sentinel/user-guides/sentinel-3-olci/resolutions/radiometric>  
Envisat MERIS heritage (<https://sentinel.esa.int/web/sentinel/user-guides/sentinel-3-olci/overview/heritage>)

Band	λ centre (nm)	Width (nm)	Function
Oa1	400	15	Aerosol correction, improved water constituent retrieval
Oa2	412.5	10	Yellow substance and <b>detrital pigments</b> (turbidity)
Oa3	442.5	10	<b>Chlorophyll</b> absorption max., biogeochemistry, vegetation
Oa4	490	10	High <b>Chlorophyll</b> , other pigments
Oa5	510	10	<b>Chlorophyll</b> , <b>sediment</b> , turbidity, red tide
Oa6	560	10	<b>Chlorophyll</b> reference (Chlorophyll minimum)
Oa7	620	10	<b>Sediment</b> loading
Oa8	665	10	<b>Chlorophyll</b> (2nd Chlorophyll absolute max.), <b>sediment</b> , yellow substance / vegetation
Oa9	673.75	7.5	For improved fluorescence retrieval and to better account for smile together with the bands 665 and 680 nm
Oa10	681.25	7.5	<b>Chlorophyll fluorescence</b> peak, red edge
Oa11	708.75	10	<b>Chlorophyll fluorescence</b> baseline, red edge transition
Oa12	753.75	7.5	O2 absorption / clouds, vegetation
Oa13	761.25	2.5	O2 absorption band / aerosol correction
Oa14	764.375	3.75	Atmospheric correction
Oa15	767.5	2.5	O2A used for cloud top pressure, fluorescence over land
Oa16	778.75	15	Atmos. corr./aerosol corr.
Oa17	865	20	Atmos. corr./aerosol corr., clouds, pixel co-registration
Oa18	885	10	Water vapour absorption reference band. Common reference band with SLSTR instrument. Vegetation monitoring
Oa19	900	10	Water vapour absorption/vegetation monitoring (maximum reflectance)
Oa20	940	20	Water vapour absorption, atmosphere / aerosol correction
Oa21	1 020	40	Atmosphere / aerosol correction

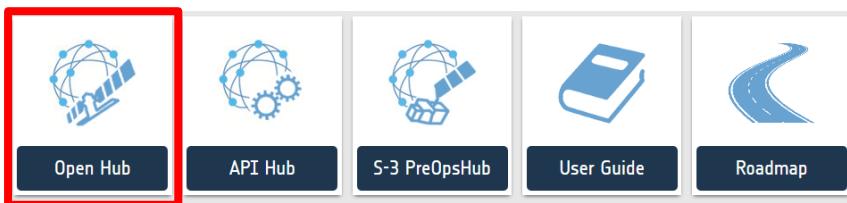

# Sentinel infrastructures

<https://sentinel.esa.int/web/sentinel/sentinel-data-access>

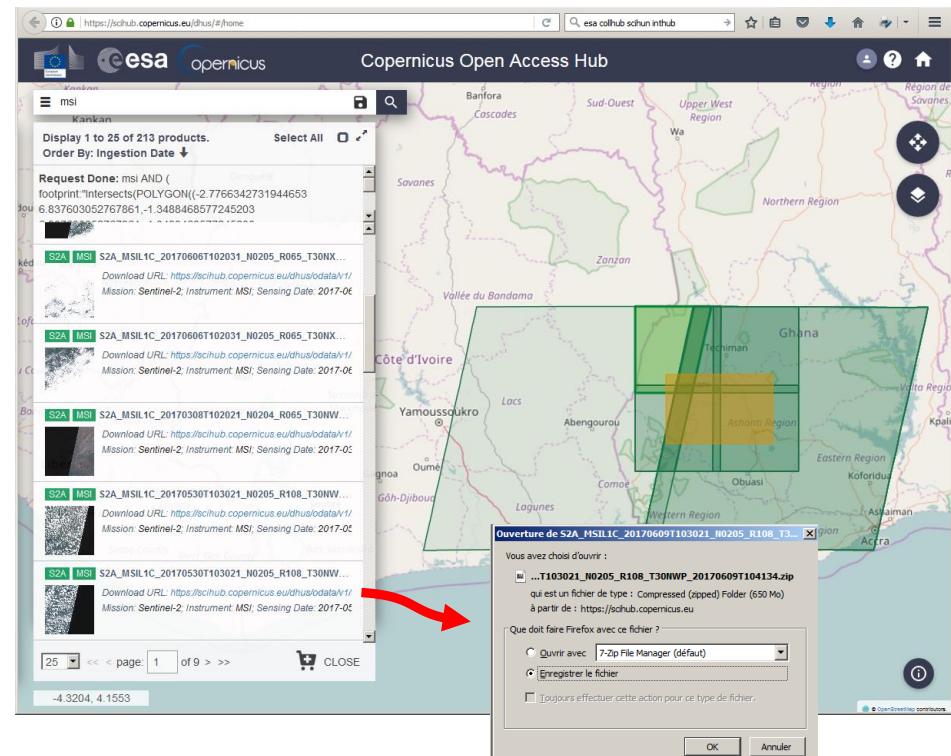

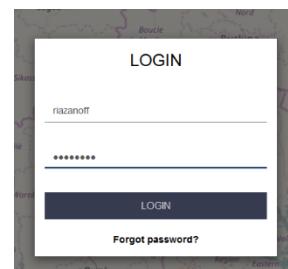

## Copernicus Open Access Hub (COA)

<https://scihub.copernicus.eu/>

<https://scihub.copernicus.eu/dhus>

# Traitement d'images

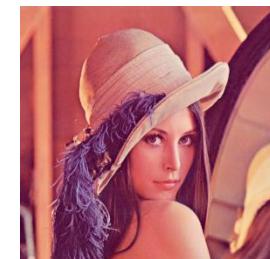

Histogramme, stretching linéaire

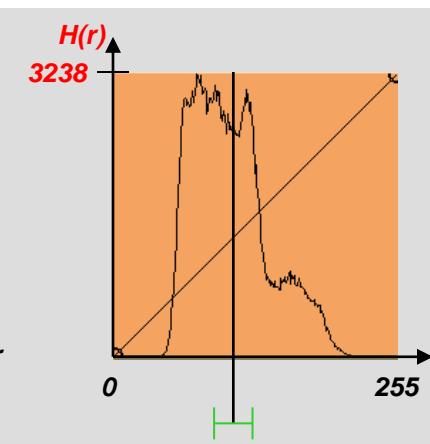

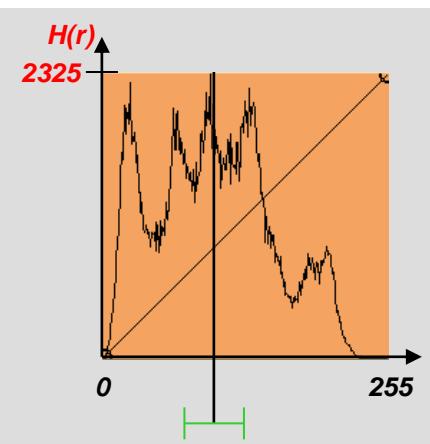

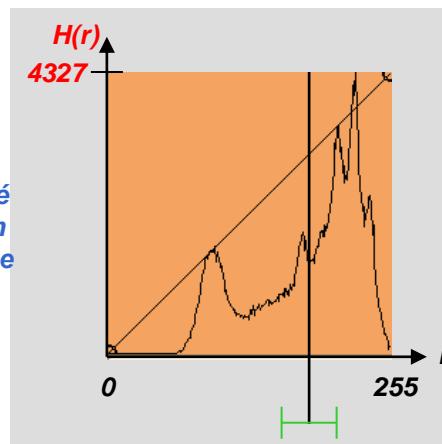

## ➤ Histogramme

$\forall r = 0 \dots 2^d-1, H(r) = \text{Card} (\{ R(i,j)=r, i=0..(M-1), j=0..(N-1) \})$  avec  $d$ : nombre de bits par pixels

$H(r)$   
Occurrences de la radiométrie  $r$  dans l'image entière

affichage calibré sur le maximum de l'histogramme ( $\max(H(k))$ )

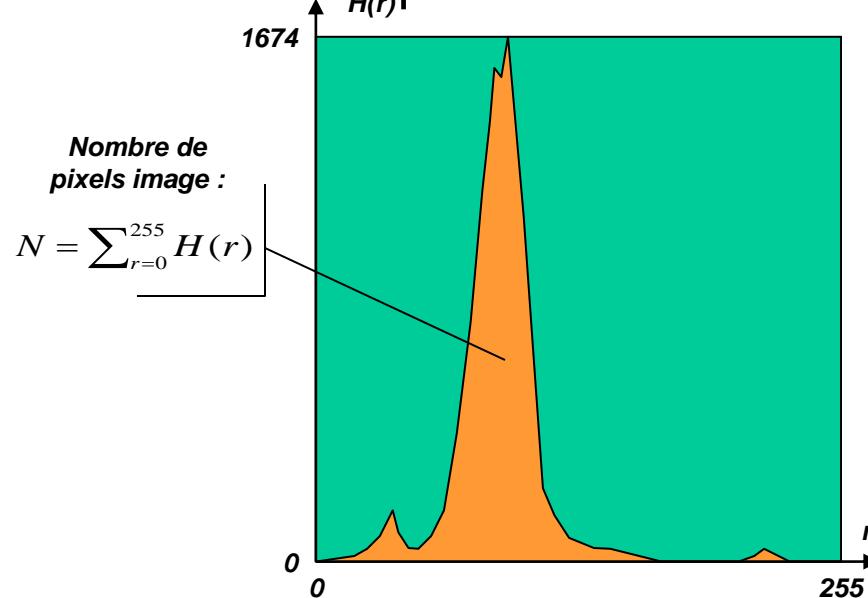

## ➤ Stretching linéaire automatique

Déterminer automatiquement les bornes  $a$  et  $b$  du stretching linéaire

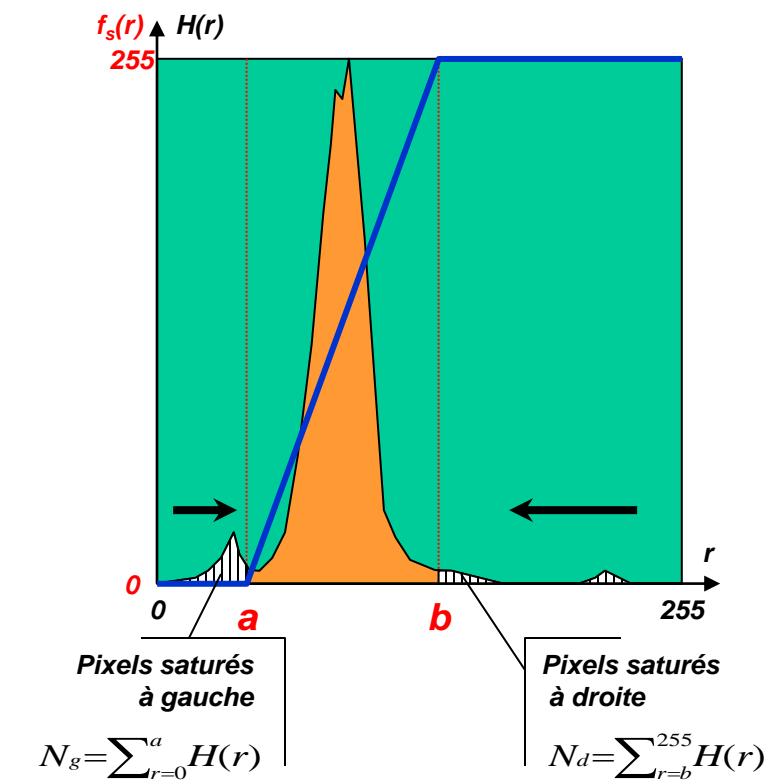

### □ Principe

$\alpha_s$  : Pourcentage de saturation

$N_s = N \times \alpha_s$  : Nombre de pixels image saturés

$N_s = N_g + N_d$

2 méthodes:

- saturer  $N_s/2$  pixels à gauche puis  $N_s/2$  pixels à droite
- saturer du côté où l'histogramme est minimal

# FLEGT Watch Web

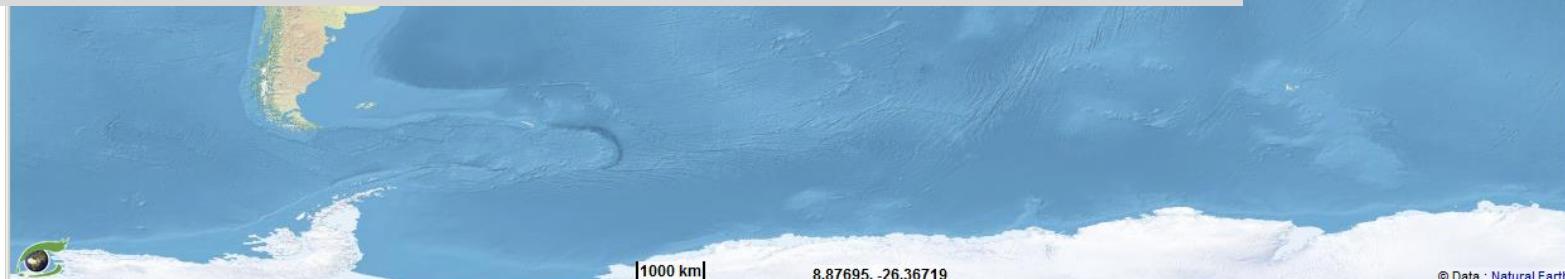

Utilisation pas-à-pas

# Launch FLEGT Watch (Web)

The screenshot shows a web browser window with multiple tabs open. The active tab is 'Flegt Watch' at <https://visioterra.org/FlegtWatch/>. The page title is 'FLEGT Watch' with the subtitle 'Forest Law Enforcement, Governance and Trade'. A search bar contains the query 'prise électrique ghana'. The main content area features a world map with a green tree icon in the top left corner. A vertical sidebar on the left has a 'Services' button. On the right, there are buttons for 'Report a problem', 'Help', and 'Login', along with a search bar for 'Search place, coordinates...' and a language dropdown set to 'English'. A 'Menu' button is located in the top right of the map area.

**<https://visioterra.org/FlegtWatch>**

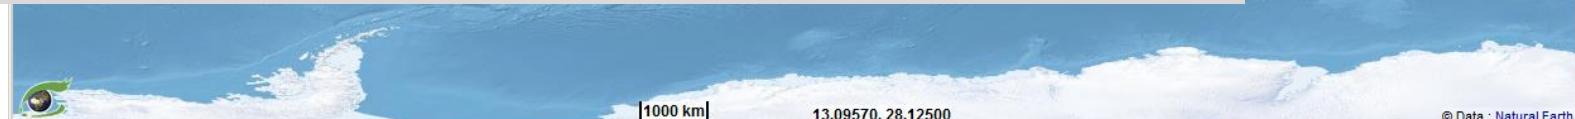

# Enter your e-mail and password

The screenshot shows a web browser window with the URL <https://visioterra.org/FlegtWatch/#>. The page title is "FLEGT Watch" and the subtitle is "Forest Law Enforcement, Governance and Trade". A search bar contains the text "prise électrique ghana". The main content area features a 3D world map. A vertical sidebar on the left has a "Services" button. An "Authentication" dialog box is open in the center, displaying the message "Not logged in". It contains fields for "Login (email)" with the value "myaddress@myserver.xo" and "Password" with the value "\*\*\*\*\*". Below the fields are buttons for "Login", "Logout", "Edit profil", and "Close".

default value of password  
for observers is “fw”

# Check that you login has been accepted

The screenshot shows a web browser window with the following details:

- Tab Bar:** Fichier, Édition, Affichage, Historique, Marque-pages, Outils, ?; comble de - Traduction X, Google Traduction X, Adresse introuvable X, Paris Aéroport | Site officiel X, Flegt Watch X, Flegt Watch X, Flegt Watch X.
- Address Bar:** https://visioterra.org/FlegtWatch/#
- Search Bar:** prise électrique ghana
- Header:** FLEGT Watch, Forest Law Enforcement, Governance and Trade. Includes "Manage monitored areas" and "Manage user" buttons. A green success message box displays "Login successfully".
- Map:** A world map showing landmasses in green and brown, representing forested and non-forested areas respectively. A "Services" button is visible on the left side of the map.
- Bottom Status Bar:** 1000 km, -22.76367, -13.53516, © Data : Natural Earth

## Open the “Services” panel and actualise the “Monitored areas”

The screenshot shows a web browser window with multiple tabs open, including "Fleg Watch" and "Google Traduction". The main content is the Fleg Watch interface. On the left, there's a sidebar with tabs like "FlegWatch", "Finder", "Missions", "GFW", "Base Maps", and "Elevations". Below these are sections for "Monitored Area" (with a dropdown menu), "Confidence" (radio buttons for Low, Medium, High), and "Events" (with a search bar). A red circle highlights the "Services" button, which is a small white button with a black outline. Another red circle highlights the refresh icon in the top right corner of the interface area. The main right side of the screen displays a 3D map of the world, centered on Africa. The bottom of the screen shows a scale bar (100 km) and coordinates (-106.08398, 10.01953). A copyright notice at the bottom right reads "© Data : Natural Earth".

## Select one of you monitored areas

The screenshot shows a web-based application window titled "Flegt Watch". The top navigation bar includes "Fichier", "Édition", "Affichage", "Historique", "Marque-pages", "Outils", and a question mark icon. The tabs are "FlegtWatch", "Finder", "Missions", "GFW", "Base Maps", and "Elevations". The "Finder" tab is active. A search bar at the top right contains the text "prise électrique ghana". Below the tabs, there are three sections: "Monitored Area", "Confidence", and "Events". The "Monitored Area" section displays a list of items, with "GHA VT01 - Kumasi / flegtwatch@visioterra.fr" highlighted in blue. The main area features a 3D world map with green and brown terrain. A scale bar at the bottom left indicates "100 km", and coordinates "-106.08398, 10.01953" are shown at the bottom center. A copyright notice "© Data : Natural Earth" is at the bottom right.

Here, I am super-user and this is why I see all the monitored areas

## You see the polygon of your monitored area

The screenshot shows a web browser window with multiple tabs open. The active tab is 'Flegt Watch' at <https://visioterra.org/FlegtWatch/#>. The interface includes a navigation bar with 'FlegtWatch', 'Finder', 'Missions', 'GFW', 'Base Maps', and 'Elevations' buttons. A search bar shows 'prise électrique ghana'. On the left, there's a sidebar with 'Monitored Area' set to 'GHA VT01 - Kumasi / flegtwatch@visioterra.fr', 'Confidence' set to 'High', and an 'Events' section showing '1-1 of 0'. The main area is a map with a large red polygon outline. A small white box labeled 'Services' is visible near the bottom of the map. At the bottom of the map, there's a scale bar '5 km' and coordinates '-106.08398, 10.01953'. The background map is a low-resolution green grid.

The default basemap is poor not to penalize the Internet transfer

# Get the list of events – Medium confidence index

The screenshot shows a web browser window with the URL <https://visioterra.org/FlegtWatch/#>. The browser has multiple tabs open, including "comble de - Traduction", "Google Traduction", "Adresse introuvable", "Paris Aéroport | Site of...", "Flegt Watch", and "Flegt Watch". The main content area displays the Flegt Watch interface.

The interface includes a top navigation bar with tabs: FlegtWatch, Finder, Missions, GFW, Base Maps, and Elevations. Below this is a search bar with the placeholder "prise électrique ghana".

On the left, there is a sidebar with sections for "Monitored Area" (set to "GHA VT01 - Kumasi / flegtwatch@visioterra.fr") and "Confidence" (radio buttons for Low, Medium, and High, with "Medium" selected). A "Search" button is also in this section, which is circled in red along with the confidence selection.

The main area shows a map with a large red circle drawn over a green forested area. The map includes zoom controls (+, -, 3D) and a scale bar (5 km).

A table titled "Events" lists 11 entries, each showing an event ID, type, date, time, location, and a small icon:

Event	Forest cover change - 2019/03/17 18:17:40	#49980	GHA VT01 - Kumasi
Event	Forest cover change - 2019/02/27 18:18:24	#46432	GHA VT01 - Kumasi

## Get the list of events – Low confidence index

The screenshot shows the Fleg Watch application interface. On the left, there is a sidebar with tabs: FlegWatch, Finder, Missions, GFW, Base Maps, and Elevations. The FlegWatch tab is selected. Below the tabs, there are sections for 'Monitored Area' (set to 'GHA VT01 - Kumasi / flegtwatch@visioterra.fr') and 'Confidence' (radio buttons for Low, Medium, and High, with 'Low' selected). A red circle highlights the 'Low' confidence radio button and the 'Search' button. To the right of the search bar is a search input field containing 'prise électrique ghana'. The main area displays a map with a large red circle drawn around a specific location. Below the map is a list of events:

Event	Description	Date
#51333	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51332	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51331	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51330	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51329	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51328	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51327	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
#51326	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24

#51318	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24
Event	Forest cover change - GHA VT01 - Kumasi	2019/04/04 18:18:24

At the bottom of the map area, there is a scale bar labeled '5 km' and a coordinate display showing '-106.08398, 10.01953'. The bottom right corner of the map area has a '3D' button. The bottom right corner of the entire interface has a copyright notice: '© Data : Natural Earth'.

## Select one event → GHA VT01 / #50900

The screenshot shows the Fleg Watch application interface. On the left, a sidebar displays a list of events under the 'Events' tab, with event #50900 highlighted. The main area shows a satellite map of a forested area in purple and green. A yellow crosshair marks the location of event #50900. A tooltip window for event #50900 provides details: 'Event #50900 - Forest cover change' with the timestamp '2019/03/29 18:17 - Now'. The bottom status bar shows coordinates '-1.50506, 6.74912' and a scale of '00 m'.

- Event Forest cover change - 2019/03/29 18:17:40
- #50906 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50905 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50904 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50903 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50902 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50901 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50900 GHA VT01 - Kumasi
- Event Forest cover change - 2019/03/29 18:17:40
- #50899 GHA VT01 - Kumasi

The event #50900 is currently selected, as indicated by a blue highlight. A small yellow crosshair icon is overlaid on the map. In the bottom right corner of the map area, a small window displays the details for this event: 'Event #50900 - Forest cover change' with the date '2019/03/29 18:17 - Before'.

On the right side of the screen, there's a 'Layer stack' panel. It lists several items:

- Temporary display (checked)
- GHA VT01 - Kumasi (checked)
- Layer stack (checked)
- Event #50900 (checked)
- Base display (checked)
  - Natural Earth From VisioTerra (checked)
  - GEBCO Bathymetry (unchecked)

# Change basemap - OpenStreetMap

The screenshot shows the FLEGT Watch application interface. At the top, there is a menu bar with options like Fichier, Édition, Affichage, Historique, Marque-pages, Outils, and a Help icon. Below the menu is a toolbar with icons for Traduction, Google Traduction, Adresse introuvable, Paris Aéroport, and three Flegt Watch tabs. The main window has a search bar with the query "prise électrique ghana".

The interface includes several panels:

- Background Maps:** A grid of nine map thumbnails. The "OpenStreetMap" thumbnail is highlighted with a red border.
- Overlay Maps:** A section for adding overlays.
- Custom WMS source:** A section for adding custom WMS sources.
- Layer stack:** A panel on the right showing the current layers in the stack. It includes sections for Temporary display, Layer stack, Event #50900, Detected Object, Base display, and GEBCO Bathymetry. The "OpenStreetMap" layer is checked under Base display.
- Map View:** The main map area showing a forested area with a yellow crosshair. A callout box indicates "Event #50900 - Forest cover change" and provides a timestamp "2019/03/29 18:17 - Before".
- Coordinates:** Coordinates "1.51382, 6.75037" are displayed at the bottom of the map.
- Data Source:** A note at the bottom right says "© Data : OpenStreetMap".

## Change basemap (2) – Bing map

The screenshot shows the FLEGT Watch application interface. On the left, there is a sidebar with tabs for "FlegtWatch", "Finder", "Missions", "GFW", "Base Maps", and "Elevations". The "Base Maps" tab is selected. A sub-menu titled "Background Maps" is open, displaying various map options:

- VMap0 (OSGeo)
- Blue Marble (NASA)
- Landsat-7 (NASA)
- OpenStreetMap (Terrestris)
- OpenStreetMap
- OSM Humanitarian
- Bing Map (Microsoft)** (this option is highlighted with a red box)
- Bing Map Road (Microsoft)
- Satellite imagery

On the right, the main window displays a satellite map of a forested area with a yellow crosshair indicating a specific location. A "Layer stack" panel on the right side of the map shows the current layers:

- Temporary display (checked):
  - GHA VT01 - Kumasi
- Layer stack (checked):
  - Event #50900 (checked):
    - Detected Object (checked)
    - Sentinel1B/CSAR/IW 2019-02-01 (unchecked)
- Base display (checked):
  - Bing Map (Microsoft) (checked)
  - GEBCO Bathymetry (unchecked)

A small pop-up window at the bottom center says "Event #50900 - Forest cover change" with a timestamp "2019/03/29 18:17 - Before". The status bar at the bottom shows coordinates "-1.51167, 6.75166" and a scale "00 m".

# Characterise the land cover

The screenshot shows a web-based mapping application for monitoring forest cover changes. The main interface includes a top navigation bar with tabs like 'Fichier', 'Édition', 'Affichage', 'Historique', 'Marque-pages', 'Outils', and a search bar. Below the navigation is a browser-style address bar with the URL <https://visioterra.org/FlegtWatch/#>. The main content area features a satellite map of a forested area with a prominent yellow polygon highlighting a specific region. A legend on the left side lists various map sources: 'Background Maps' (VMap0 (OSGeo), Blue Marble (NASA)), 'Services' (OpenStreetMap, OSM Humanitarian, Bing Map (Microsoft), Bing Map Road (Microsoft)), 'Overlay Maps', and 'Custom WMS source'. A small information box at the bottom left of the map indicates 'Event #50900 - Forest cover change' dated '2019/03/29 18:17 - Before'. The bottom right corner credits '© Data : Bing Maps'.

From the map

## Getting other data – 2. Define (possibly) a date or a date interval

Screenshot of the Flegt Watch application interface showing a satellite map and search parameters.

The search parameters on the left side of the interface include:

- Area of interest (AOI)
- Minimum overlay (%)
- Date start (highlighted with a red box)
- Date stop
- Status
- Dataset
- Cloud Cover
- Limit: 100

The Date start field shows 2019-02-01 00:00:00. The Date stop field shows 2019-04-07 23:59:59.

The search results on the right side show a large yellow circle representing the Area of Interest (AOI) centered over a green landscape. A smaller yellow square highlights a specific point of interest within the AOI.

Map controls and status information at the bottom:

- Services
- 3D
- 5 km scale bar
- Coordinates: -1.59971, 6.77169
- © Data : Bing Maps

## Getting other data – 3. Define dataset(s)

The screenshot shows the FLEGT Watch software interface. On the left, a sidebar titled 'Dataset' is expanded, showing a list of datasets under 'ESA'. Under 'Sentinel2A', 'MSI' is checked. Under 'Sentinel2B', 'MSI' is also checked. Other options like 'Sentinel1A', 'Sentinel1B', 'MSIL2A', 'MSIL2B', 'Sentinel3A', 'NASA', 'GPM', and 'VisioTerra' are listed but not selected. A large yellow circle highlights the area of interest (AOI) on a satellite map of a forested area. A smaller yellow rectangle highlights a specific location within the AOI. The map includes a scale bar (5 km) and coordinates (-1.59971, 6.77169). The bottom right corner of the map area says '© Data : Bing Maps'.
